

SOLUTIONS · FIXTURE-IN-FIXTURE

Fixture-in-Fixture

Reduce labor costs.
Improve ceiling quality.

More than an upgrade — a new approach to lighting. A complete LED luminaire, delivered as a single piece, installs directly into the **existing housing**.

No plenum access. No adjustment to surrounding systems. No impact on existing certifications or code compliance.

<p>PLENUM No access required</p>	<p>SITE No room-side disruption</p>	<p>METHOD Direct ceiling installation</p>

A COMPLETE LUMINAIRE

A full LED luminaire, tailored to your Class 1A space and built to fit the housing already in your ceiling.

- ✓ **Tailored, not adapted** — optics, driver, and finish specified as one unit.
- ✓ **Same footprint** — the existing housing stays, the ceiling grid is untouched.
- ✓ **Certified as installed** — to UL 1598C and CSA C22.2 No. 250.1-16.

Available Form Factors

5 FORMATS · 1 INSTALLATION METHOD

 <p>ALTO CURVED PANEL</p>	 <p>BEVEL BEVELED PROFILE</p>	 <p>ONCURVE CONTINUOUS CURVE</p>	 <p>LRK-STR LINEAR STRIP</p>	 <p>REVEL CENTER BLADE</p>

— **KEY BENEFITS**

The 3 advantages of Fixture-in-Fixture solutions

A direct replacement of fluorescent systems with a complete LED luminaire, engineered for existing conditions. No housing removal and no new framing — the same ceiling footprint, new performance.

BACK

02

01 — AESTHETICS

Aesthetic flexibility

Match the lighting to the architectural intent, without compromises tied to existing conditions.

Five formats and several light distributions for a uniform, consistent result across the ceiling.

02 — CONSTRUCTION

One-piece design

A complete luminaire delivered as a single piece. No on-site assembly, no field adjustment.

The result: no variation between installations, a faster mount, and a uniform look from one luminaire to the next.

03 — LABOR

Reduced labor

Installed directly from the existing ceiling:

- No demolition work
- No plenum access
- No additional trades required

Installation time drops, labor costs stay controlled, and disruption in occupied spaces is kept to a minimum.

IMPLEMENTATION

Modernize your space in 4 steps

A structured approach to ensure a precise fit and a result that conforms to existing conditions.

01

ASSESS

Get in touch to evaluate the project.

02

SELECT

Choose the format suited to the space.

03

SAMPLE

Provide a sample of the existing housing.

04

APPROVE

Approve the final configuration before production.

— **Certifications**

Designed and certified as a complete luminaire installed within an existing housing.

UL 1598C
FIELD-MODIFIED
LUMINAIRES

CSA C22.2
No. 250.1-16
CANADIAN
LIGHTING
STANDARD

Suitable for installation in permanently installed fluorescent luminaires — no new housing certification required.

NEXT STEP

Let's start your modernization project.

Share your plans or a sample of an existing luminaire and our team identifies the right format and prepares the final configuration.
