

Fixture-In-Fixture Solutions

Reduce Labour Costs, Increase Aesthetics

Outdated T8 - Fluorescent Lighting

New & Improved LED Form Factor

More Than an Upgrade - A New Lighting Experience

Our solutions don't just update your lighting, they transform how your space looks and works. With tenants expecting modern, upgraded environments, renovations need to be fast, efficient, and clean. Our New Fixture-in-Fixture solution allows you to install a completely new fixture directly into the existing housing, no plenum disruption, no re-certification, and no compromise on UL or CSA compliance.

3 Key Benefits of Fixture-In-Fixture:

Labor Savings:

Install new fixtures directly into existing housings - no demolition, no disposal. This streamlined process cuts labor time and costs, avoids plenum disruption, and supports cleaner, more sustainable upgrades.

One-Piece Design:

Unlike multi-piece systems, our single-piece construction simplifies installation, reduces complexity, and saves valuable time - delivering a cost-effective upgrade without compromising quality.

Aesthetic Freedom:

Refresh your space or match existing designs - without any limitations. Fixture-in-Fixture offers complete style flexibility, ensuring your lighting upgrade enhances both look and function.

Multiple Form Factors to Choose from.
