

MD1-DCR

Patient Room Lighting with Versatility and Style

Certolux's MD1-DCR series of recessed patient room luminaire combines aesthetics appeal and practicality with ease.

The MD1-DCR provides comfortable ambient illumination from a concave diffuse lens. The lens is evenly lit, hiding the LED source and accenting its surface contours.

The MD1-DCR series boasts a sealed one-piece smooth lens design, offering easy cleaning and maintenance. An optional low voltage controller is available with dimming and non-dimming functions. The controller can be configured to provide bed-side on/off control, seamlessly integrating with the CCT tuning system to enhance patient comfort. Also available with a separate Chart/Night observation light option that can provide up to 500 lumens.

MD1-DCR series of recessed patient room luminaires not only enhance the visual appeal of healthcare spaces but also prioritizes patient well-being and ease of use.
