

MD2-DCR

Patient Room Lighting with Versatility and Style

Certolux's MD2-DCR series, of patient room lighting solution seamlessly integrates aesthetics, practicality, and convenience.

The MD2-DCR features a unique concave diffuse dome lens that delivers two types of illumination - a high-performance exam light and a comforting ambient light. The CRI or CCT for each function can be selected separately to provide both a comfortable space for the patient and accurate health assessments for the clinical staff.

The smooth, one-piece lens is not only visually appealing but also easy to clean and maintain. For added functionality, an optional low voltage controller is available with dimming and non-dimming functions. The series also offers a unique Chart/Night observation light option, providing up to 500 lumens of illumination.

The MD2-DCR is an ideal blend of style and functionality, while enhancing the overall visual ambiance.
