

MD3-4200

Precision Lighting for Superior Care.

The MD3-4200 by Certolux offers a sleek, linear lighting solution designed to provide exceptional vertical illumination in a patient room setting.

Installed in pairs, this fixture delivers both exam and ambient lighting, ensuring a balanced and comfortable environment. It also features a third reading light, with small, diffuse apertures perfectly positioned to enhance patient reading tasks. Available with amber or white night light options, it offers gentle, low-level illumination for staff, ensuring patient rest is undisturbed during overnight tasks.

When optionally provided with a low voltage controller within the primary fixture, the MD3-4200 simplifies wiring and bed control. Crafted with durability and precision, the MD3-4200 is built from 20-gauge cold-rolled steel, featuring a welded construction with integral flanges for easy grid interface.

This combination of functionality and refined design makes the MD3-4200 an ideal choice for modern healthcare environments.

Features:

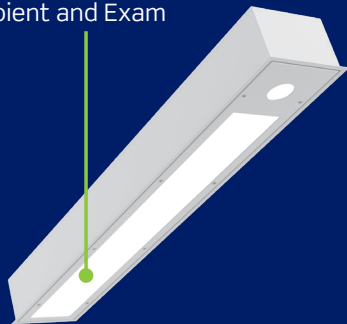

- High hiding diffuse frost lens
- Asymmetric Exam optics
- Separate CCT & CRI for Exam & Ambient mode
- Designed for use in pairs

Options:

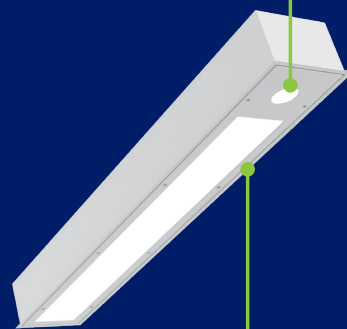

- Anti-microbial finish
- Tunable white
- BIOS® SkyBlue®
- Prewired Whip option simplifies installation
- Integral dimming low voltage controller options
- Night/Chart light in amber or white

MD3-4200 installed in pairs offering both exam and ambient outputs.

Specify separate CCTs for Ambient and Exam Modes

Reading aperture with sealed lens

Thick translucent-diffuse white lens secured and sealed to inner surface of door
