

MSUi-Plenum Access

Most Advanced Surgical Troffer with Plenum Access.

The MSUi series with Plenum Access provides access above the ceiling, through the fixture and supplemental lighting for the operating room. MSUi-Plenum Access helps prevent any damage that is caused by removing the fixture and allows for a quick turnaround for a fully operational surgical room.

This fixture is commonly located above the table perimeter using Symmetric or Asymmetric distributions. MSUi is designed for recessed mounting in surgical ceiling systems as well as grid and flanged installations.

Highlights:

- Easy access
- Less cleanup - back in service quickly
- Located near where you need to work
- Lower cost than sealed access panels
- No added installation labor

Features:

- Shallow design, 4" deep with emergency
- Dimming to 1% (0-10V)
- Triple gasketed cleanroom construction
- Smooth lens for easy cleaning
- Room side access to all electrical components

Available sizes: 2x2 | 2x4

Featured Options:

- Fully luminous lens aperture option
- Up to 24,000 lumens
- Symmetric & Asymmetric options
- Optional 90CRI

Approvals:

- UL listed to CSA and UL standards for insulated ceilings and wet location
- MIL STD 461G Certified
- Cleanroom class ISO3-8
- Certified IP65 & Certified NSF2
