

VRSCS | Correctional Luminaire

Purpose Built Lighting for Correctional Maximum Security and Vandal Resistant Applications.

The VRSCS series by Certolux is a specification-grade luminaire designed for maximum security and vandal-resistant applications. Engineered for ceiling surface mount applications, the VRSCS luminaire offers exceptional performance and durability. Its design is tailored to withstand the rigors of correctional facilities, providing a reliable lighting solution that enhance inmate safety and security. An optional ligature-resistant construction further reinforces its suitability for high-risk areas, making it a trusted choice for correctional institutions.

Commonly used within inmate cells, this luminaire features a robust clamshell design with concealed hinges, tamper resistant fasteners, and a contraband-trapping backplate. The security lenses and sloped sides maximize impact resistance, and the Torx security fasteners prevent unauthorized tampering or access, ensuring reliable performance in the most demanding environments.

Available with selectable features and options, including various lens types, integral controls, emergency battery backup, and more. Certolux's VRSCS series can be tailored to meet specific needs and requirements of any correctional facility.

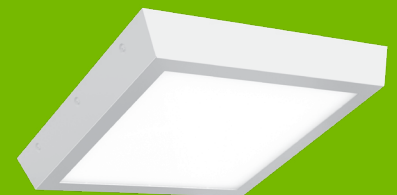

CERTIFIED To Perform
