

LBPC

Efficient, Flexible and Modern Lighting

The Visioneering LBPC Troffer is a sleek and efficient lighting solution designed to meet the demands of modern spaces. With its ultra-slim 2" depth, it easily fits into areas with obstructed plenums or low ceilings, making it an ideal choice for challenging installations. Its fully luminous aperture delivers a clean, contemporary look, while providing uniform and even illumination, ensuring comfort and enhanced productivity.

The LBPC is engineered to exceed expectations, providing a blend of style, performance, and energy efficiency. Whether you need adaptable controls, tunable white functionality, or a sleek design to fit in tight spaces, the LBPC is the versatile solution for your lighting needs.

Features:

- Fully luminous aperture
- 1x4, 2x2, 2x4 and 20x60 configurations
- Standard low voltage (0-10V) 10% dimming
