

LGH | LED Hexagonal

Six Sides of Appeal

The sleek hexagonal profile of Visioneering's LGH presents a contemporary aesthetic that will highlight any application. From suspended open ceilings to wall surface applications, the LGH's combination of form and function makes it an ideal lighting solution for a wide range of spaces including retail, educational, storage, factories, and warehouses.

The premium-grade LGH features a durable formed polycarbonate lens that supports ease of installation and uniform illumination. It also offers high efficacy with up to 153 lumens per watt. The optional slots provide up to 10% up light to reduce the cavern effect where needed. The LGH's universal design also supports cable suspension, surface mounting, and stem mounting in stand-alone and row-mounted configurations.

Features:

- Contractor friendly polycarbonate lens
- Standard stem mounting knockouts
- Standard ceiling/surface mounting
- Low voltage dimming (0-10v, 1%)

Featured Options:

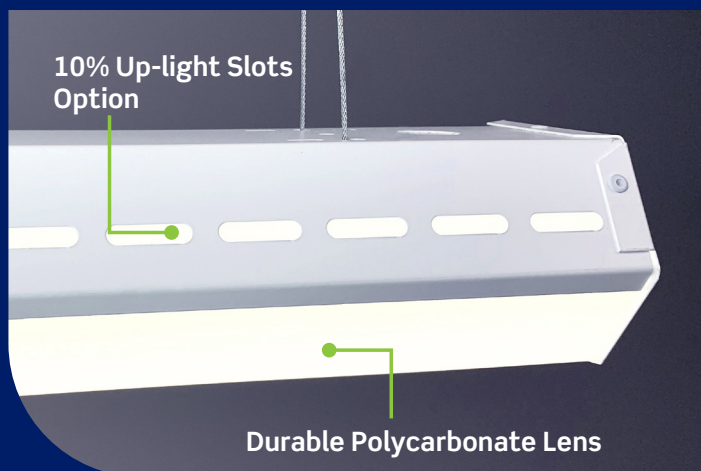

- 10% Up-light Slots
- Corner Mounting Available
- Available with row mounting

4ft. Linear

8ft. Linear
