

LMEZ 3

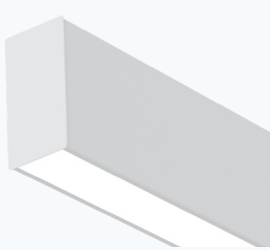

Architectural Linear Lighting with multiple lens options.

Visioneering's LMEZ 3 (Direct/Indirect) linear architectural luminaire features multiple configurations and options suited for applications such as offices, classrooms, libraries, retail stores, supermarkets and more.

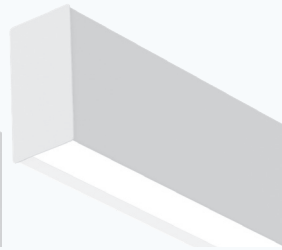

This suspended mount luminaire provide general illumination in both the horizontal and vertical planes. They are suitable for individual suspension or continuous rows where direct/indirect linear lighting is desired.

Multiple lens options to select from:

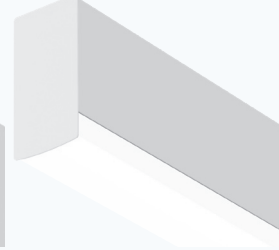

Lay-in Lens
(Standard)

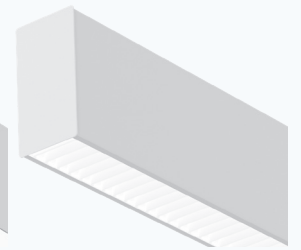

Regressed Lens
(P33 Option)

Inverted-V Lens
(P119 Option)

Drop Lens
(P95 Option)

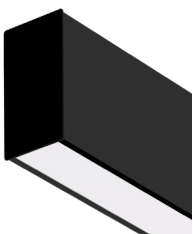

Straight Blade Louver
(L42 Option - White)
(L44 Option - Silver Gray)

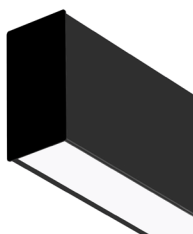

Hidden in Plain Sight!

Viscor's black optics allow the true aesthetics of your architectural space to take center stage. Visible when you need light, invisible when you don't. Fixtures seamlessly integrate into the room's design providing even illumination when required and disappearing into the architecture when not.

Black Acrylic Lay-in Bottom Lens (P114 Option)

Lay-in Lens

Regressed Lens

Inverted-V Lens
