

OnCurve

Wayfinding made easier with the OnCurve Spine Option

Visioneering's new OnCurve luminaire combines a fully luminous concave lens and enhanced center spine with a color option to create a perfect wayfinding solution. OnCurve's center spine color option can be matched with specified RAL colors to be used for various wayfinding applications. The OnCurve offers dynamic styling and high visual comfort with a soft curved lens and low glare illumination.

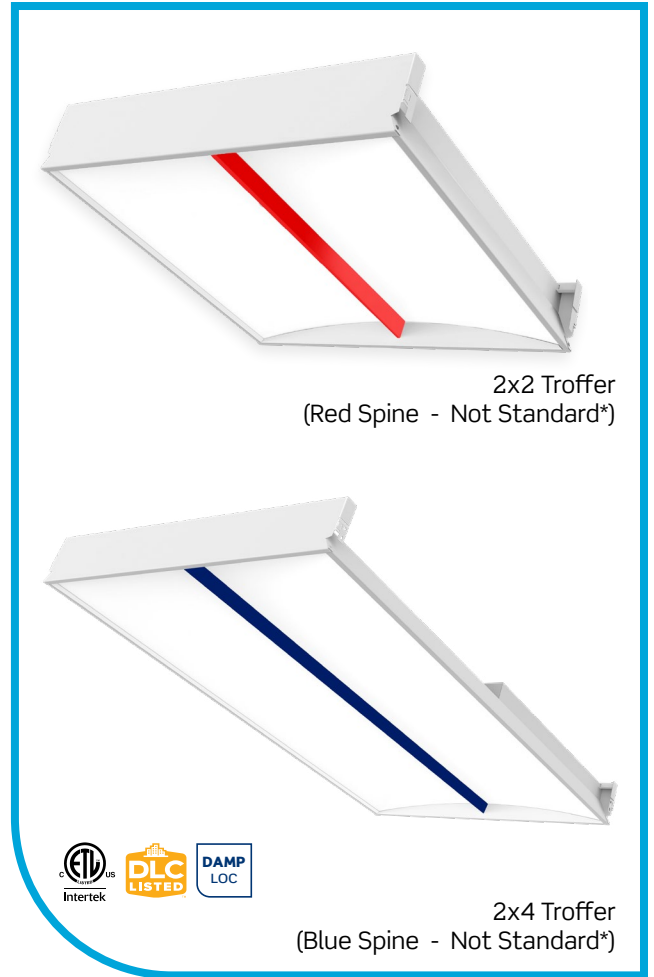

This fully illuminated architectural troffer delivers best-in-class performance and uniform lighting for various spaces.

Features:

- Color spine option
- Matchable specified RAL colors
- Fully luminous aperture
- Even and consistent illumination
- Enhanced glare control (UGR as low as 15)
- Field-serviceable

Enhanced Design

OnCurve's concave contemporary lens design offers configurability and versatility to any T-Bar and hard ceiling applications and is available in the following sizes 1x4, 2x2 and 2x4.

*Minimum order quantities may apply, consult factory for details.
