

OnCurve

Concave 20x60 architectural troffer provides even illumination.

Visioneering's new OnCurve family of recessed troffers provide architectural appeal and uniform lighting for various spaces. With a UGR as low as 15, these fully luminous troffers provide dynamic styling and high visual comfort with low glare illumination. OnCurve's concave contemporary lens design offers soft curves, configurability, and versatility to any T-Bar or hard ceiling application. These architectural troffers deliver best-in-class performance.

Features:

- Fully luminous aperture
- Even and consistent illumination
- Enhanced glare control (UGR as low as 15)
- Quality Contractor-friendly polycarbonate lens
- Best-in-class performance
- Field-serviceable

OnCurve provides clean curves and dynamic styling

OnCurve's clean lines will enhance the architectural appeal of office areas, retail stores, classrooms, hospitals, nursing homes, hospitality, and new construction spaces.

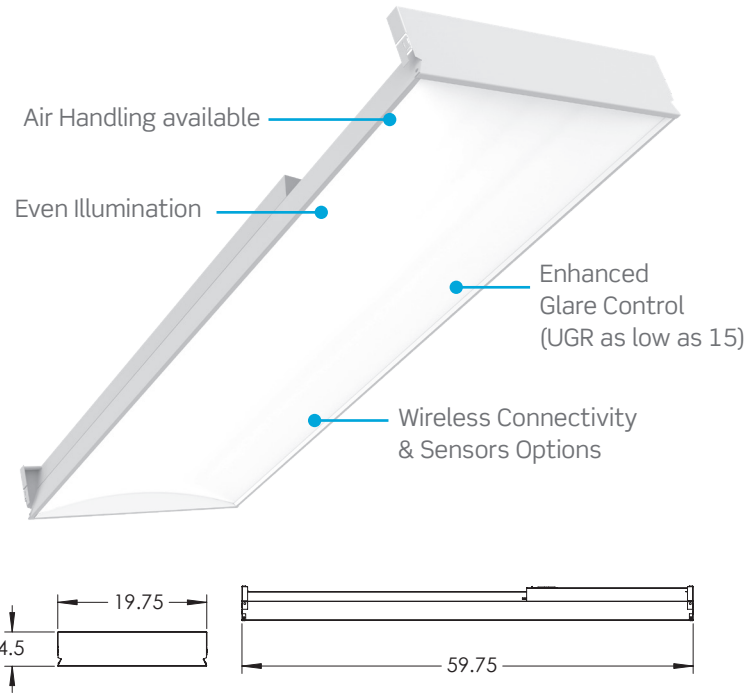

You've Got Control!

The OnCurve luminaires provide either integral room side* or plenum side controls along with other control options below, such as:

- Wireless switching
- Occupancy sensing
- Daylight harvesting
- Fixture or Group level control
- Time of day scheduling

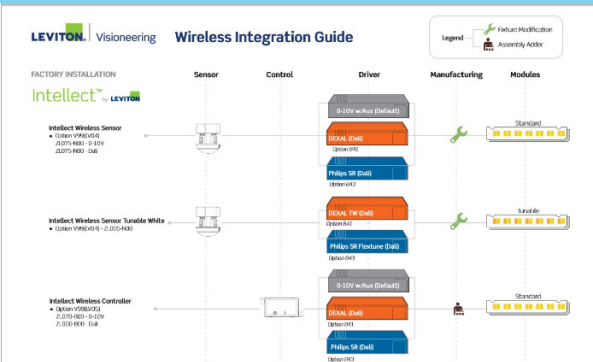

For other available lighting options:
