OnCurve Architectural Troffers

Subtle illumination and clean curves to compliment architectural spaces.

OnCurve

Concave and Convex architectural troffers provide even illumination.

Visioneering's new OnCurve family of recessed troffers provide architectural appeal and uniform lighting for various spaces. These fully luminous troffers provide dynamic styling and high visual comfort with a soft curved lens and low glare illumination. OnCurve's concave and convex contemporary lens design offers configurability and versatility to any T-Bar and hard ceiling applications. These architectural troffers deliver best-in-class performance.

Features:

- Fully luminous aperture
- Even and consistent illumination
- Enhanced glare control (UGR as low as 15)
- Quality Contractor-friendly polycarbonate lens
- Best-in-class performance
- Field-serviceable

OnCurve provides clean curves and dynamic styling

OnCurve's clean lines will enhance the architectural appeal of office areas, retail stores, classrooms, hospitals, nursing homes, hospitality, and new construction spaces. The concave and convex lens options can be utilized individually to create a clean and subtle look or combined to deliver a truly architectural design.

Example of 3 Concave's and 3 Convex's.

OnCurve Family of Architectural Recessed Troffers

The OnCurve family of architectural recessed troffers consists of 3 unique designs to enhance any space. The Concave lens provides added glare control while the center spine option adds a unique architectural appeal and point of interest. The Convex lens introduces an even glow and subtle curve into a, otherwise, flat ceiling surface.

Concave Lens

Concave Lens with Center Spine*
*Color options available

Convex Lens

Enhance the design

Select the Center spine configuration to increase the design appeal. Custom colors are also available to compliment your existing palette or just to add a little personality to your architectural space.

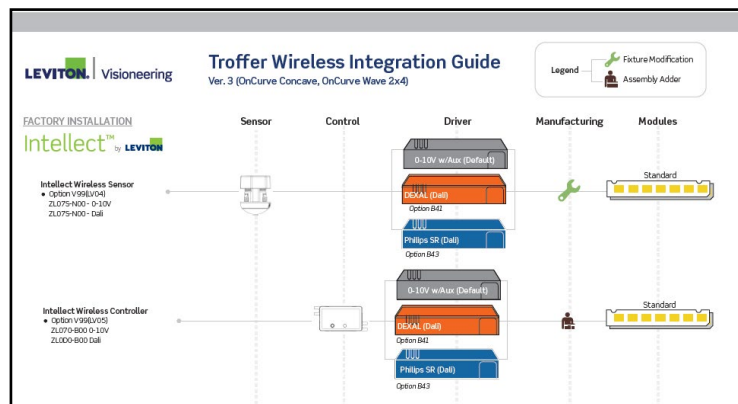

Styles	Available Sizes		
	2x2	1x4	2x4
Concave Lens 	✓	✓	✓
Concave Lens w/Center Spine 	✓	✓	✓
Convex Lens 	✓		

You've Got Control!

The OnCurve luminaires provide either integral room side* or plenum side controls along with other control options below, such as:

- Wireless switching
- Occupancy sensing
- Daylight harvesting
- Fixture or Group level control
- Time of day scheduling

Refer to Wireless Integration Guide for complete details on the available controls.
*Concave Lens Only

Concave 20x60 architectural troffer provides even illumination.

OnCurve Wave

Make waves of architectural flare with OnCurve Wave. The Wave features a combination of curved convex and concave lenses that bring organic flow and modern styling to any architectural space. Create a grand ceiling visual with the 4x4 and, for a more refined appearance, incorporate the 2x4.

The OnCurve Wave will enhance the look of your space providing modern aesthetics coupled with optimal illumination. These fully luminous troffers provide dynamic styling and high visual comfort with soft curved lenses and low glare illumination.

Design a contemporary ceiling configuration using OnCurve series of luminaires or a simplified look by using just one.
