

Wet Location Recessed Troffers

Recessed troffers designed and built for demanding wet and dusty environments

Visioneering's series of wet location recessed troffers are both functional, stylish and suited for shallow and obstructed plenum applications. They are fitted for in-lay T-bar and drywall ceilings, making it perfect for indoor spaces. This series of recessed troffers is offered in 3 different sizes with various lumen packages. These IC-rated luminaires are constructed with a welded steel housing and finished with white polyester powder paint. Various lens options are available with the additional option to add tamper proof fasteners.

**Shown here with the LRTA Wet Location*
