

## NOTES

- Installation should be completed by an individual familiar with the construction and operation of the luminaire.
- Installation of luminaire must be in accordance with national and local building and electrical codes.
- Carefully read and follow all warnings and instructions before installing or servicing the luminaire.
- Instructions do not cover all details and all possible product configurations
- Do not restrict luminaire ventilation.
- Ensure LED luminaire is not covered with material that will prevent convection or conduction cooling.
- Do not exceed luminaire's maximum ambient temperature.
- Ensure LED luminaire has the correct polarity before installation.
- These products have maximum rated output voltage that exceeds the voltage limits that cannot be accessible based on voltage restrictions for Class 2 circuits in Canadian Electrical Code. This output complies with the definition of Class 2 per Canadian Electrical Code. This product complies with this requirement since the installation instruction requires installation in restricted access area.
- For luminaires equipped with EM (Battery Packs), additional wires may need to be routed through luminaire (by others).

## WARNINGS

### Electric shock:

- Disconnect or turn off power before installing or servicing luminaire.
- **Fixture should ONLY be powered on with access plate installed in fixture.**
- All electrical wiring to be completed by a qualified licensed electrician in accordance with local and National/Canadian Electrical Code.
- Ensure supply voltage corresponds with the correct ballast/driver voltage.
- Avoid exposing wiring to metal edges and sharp objects.
- Ensure that the luminaire is properly grounded to prevent electric hazards.
- Before powering up fixture, perform appropriate testing to ensure the fixture is properly grounded.

### Fire:

- Keep flammable and combustible materials away from the light source and/or lens.

- Use correctly rated supply conductors as indicated by product labeling.

### Burn:

- Allow luminaire to cool before handling luminaire.

### Personal Injury:

- Wear safety glasses and gloves when handling the luminaire to avoid physical injury.
- Avoid direct eye contact with light source.
- Always support the weight of the luminaire.

### Intended Use:

- Certain airborne contaminants can diminish integrity of acrylic and/or polycarbonate.
- Certain airborne contaminants may also adversely affect the functioning of LEDs and other electronic components, depending on various factors such as concentrations of the contaminants, ventilation, and temperature at the end-user location.
- Failure due to the effect of contaminants is not covered under our standard terms of warranty.

Manufacturer is not responsible for any injuries due to the improper installation or handling of its products.

Nominal Fixture Length	2ft	4ft	6ft
Fixture Type	Stand Alone	Stand Alone	Stand Alone
Canopy Spacing	18"	40"	62"

# BWY Installation Instructions

ERP# IIS00427  
09/04/2025 Rev 1.0

## Instructions:

1. Disconnect power.
2. Install canopy sets (cross bar, threaded rod, canopy, cable coupler, AC cable, power cord) and connect power cord (Fig.1). For spacing refer to table provided.
3. Install cable grippers vis 1/4-20 threaded rods (supplied) to the fixtures (Fig. 2).
4. Hang by inserting AC cables through cable grippers. Adjust suspension height as required, repeat for other side. Level the fixture.
5. Remove screws to access plate and make wiring connections according to local electrical codes.
6. Connect power.

Fig 1

Fig. 2

## Lens Removal:

1. With screwdriver or similar, gently pry open the lens from housing ensuring the holes pop out from tabs.
2. Squeeze gently the side tabs of lens to facilitate removal.
