

VWP - Confinement

Vandal Resistant Wall Plate

Project:	Catalog:	Type:
Notes:		

Product Specifications - Application

The VWP series of wall plates by Certolux are specification-grade, detention/security surface mounted wall plates for vandal resistant applications. Designed for use in poured concrete, block or steel wall construction.

Cover Plate

Precision die formed, single piece 10 gauge cold rolled steel construction. Countersunk holes for security fasteners.

Backplate

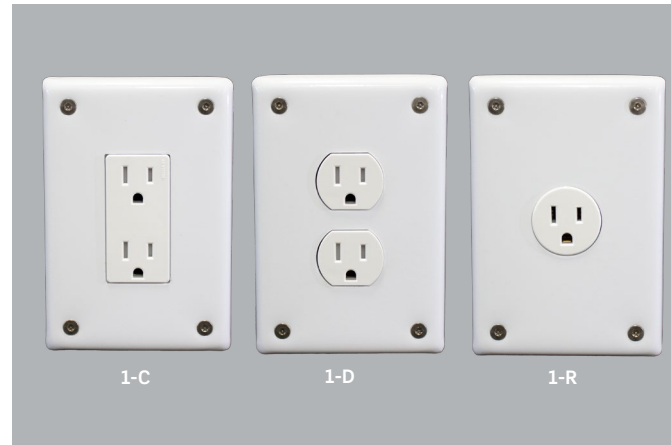

The back plate is 12 gauge galvanized steel with threaded holes provided to the cover attachment. Slots are provided for device attachment to junction box (by others).

Fasteners

Tamper resistant TORX® Head with center pin fasteners are standard.

Finish

The cover plate is in a polyester powder painted white finish. Other colors are available (consult factory).

	Width	Height
Single Gang	3.75"	5.5"
2 Gang (Duplex)	5.5"	
3 Gang	7.25"	

Order Key

EXAMPLE: VWB-AA-3-SSD (as shown below)

(Three gang cover with two switches and a duplex receptacle, as shown below)
